BARK

find the sitter your dog deserves

**Description:**

The purpose of the BARK application is to provide dog owners with a convenient way to hire dog sitters. The owners will be able to search and filter from a page of available sitters. Information about the dog sitter will be listed, allowing owners to find the best fit for their dog.

Core Features:**Landing Page**

- The logo, color scheme w/ sample photos, a simple service / application explanation, options to login or signup, reviews at bottom

User Dashboard

- Owner information: name, age, gender, address (NYC Boroughs only), contact info
- Dog information: name, breed of dog, weight, age, difficulty level, picture of dog
- Find a sitter button brings you to page with list of sitters

Available Sitters Page

- Name of Sitter, Photo of Sitter, Rating, Price Rate, Sitter profile page link
- Will have a tile view of all available sitters with option to filter by price, size of dog, temperament

Sitter Profile Page

- Rating, reviews, photos of person, borough, age, gender, number of dogs sat previously
- Hire Request Button: Select if walking or sitting and the amount of time needed to sit or walk the dog.
- Add Sitter Review with rating

Extra Features:

Cancel Request Option

Add Sitter Option

- allowing users to become listed as a sitter

Add dog review

- allowing sitters to review a dog

Add owner review

- allowing sitters to review an owner

Add Sitter view to User Dashboard

- List of Requests, edit sitter profile
 - Extra extra: Set pay rate based on dog conditions (Size, weight, behaviors)
